Category Drug Class	Formulary Options
Autoimmune and Hepatitis C *	For some clients, an Indication Based Formulary will be utilized for products in these classes and may result in additional exclusions.
Drugs for infusion into spaces other than the blood	A drug which must be infused into a space other than the blood will generally be excluded from the prescription benefit.
Generics	Limited source generics may be evaluated when appropriate and potentially removed from the formulary.
Hepatitis C	As new products launch in this class, all existing products in the class will be re-evaluated to determine appropriate formulary placement and potentially excluded, added back to formulary or not listed.
Hyperinflation	On a quarterly basis, products with significant cost inflation that have clinically appropriate and more cost-effective alternatives may be evaluated and potentially removed from the formulary.
New-to-Market Agents <sup>1</sup>	New-to-market products and new variations of products already in the marketplace will not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark® National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval.
Specialty	As new specialty products launch, all existing products in the class will be re-evaluated to determine appropriate formulary placement and potentially excluded, added back to formulary or not listed.

The listed formulary options are subject to change.

Subject to applicable laws and regulations.

- \* This list indicates the common uses for which the drug is prescribed. Some drugs are prescribed for more than one condition.
- <sup>1</sup> An exception process may exist for specific clinical or regulatory circumstances that may require coverage of an excluded medication. If your doctor believes you have a specific clinical need for an excluded product, he or she should fax an exception request to: 1-888-487-9257.
- <sup>2</sup> For use in patients previously treated with an HCV regimen containing an NS5A inhibitor (for genotypes 1-6) or sofosbuvir without an NS5A inhibitor (for genotypes 1a or 3).
- <sup>3</sup> If approved for coverage and prescribed for primary prevention of cardiovascular disease, may be covered without cost sharing through an exceptions process.
- <sup>4</sup> Rebranded or private label formulations are not covered (i.e., RELION).
- <sup>5</sup> BD ULTRAFINE syringes and needles are the only preferred options.
- <sup>6</sup> A ONETOUCH blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ONETOUCH. For more information on how to obtain a blood glucose meter, call: 1-800-588-4456.
- <sup>7</sup> ONETOUCH brand test strips are the only preferred options.
- <sup>8</sup> Listing reflects the authorized generics for TESTIM and VOGELXO.
